Mini Pro

Cost-effective, Professionally Managed Server

Our introduction to the managed server range is the Mini Pro. It is suited to those on a budget and whose sites, whilst mission critical, do not require the guaranteed fail-over and uptime of a RAID system. The server does, however, include all the **superlative management and backup facilities** described previously. Its memory and processing capabilities allow moderate traffic sites to run very well.

You may transfer up to **1000 Gigabytes of included data transfer** per month through the Mini Pro. This is significantly more than any other entry-level managed server from any commercial source, and **will allow your site to grow comfortably**.

Small businesses and new ventures will benefit enormously from the well supported value for money that the Mini Pro represents. The Mini Pro is housed in a compact but well-ventilated **1U case**.

- **Basics**
 - Debian / GNU Linux1
 - Web control panel1
 - Service Level Guarantee99.9%
 - Network BackupWeekly
 - Linux firewall systems1
 - 24 hour network monitoring and paging1

- **Key Hardware**

- Rack mount 1U
- Processor Quad Core AMD Athlon
- Memory 4GB
- Disk Space 2 x 500GB SATA
- Motherboard Standard

- **Bandwidth & Environment**

- Bandwidth 1TB per month

- **O.S. & Software**

- Operating system Debian/GNU Linux.
- Web server Apache.
- Server access Unix shell (via SSH), FTP, web-based Control Panel. Superuser (root) access allowed
