## NETGEAR Product Security

NETGEAR's mission is to be the innovative leader in connecting the world to the internet. To achieve this mission, we strive to earn and maintain the trust of our customers by delivering products that are secure and that will protect the privacy and security of our customers' data.

We appreciate having security concerns brought to our attention and are constantly monitoring our products to get in front of the latest threats. Being pro-active rather than re-active to emerging security issues is a fundamental belief at NETGEAR. NETGEAR strives to keep up-to-date on the latest security developments by working with both security researchers and companies. We appreciate the community's efforts in creating a more secure world.

To protect users, NETGEAR does not publicly announce security vulnerabilities until fixes are publicly available, nor are the exact details of such vulnerabilities released. Once fixes are available, NETGEAR will announce the vulnerabilities here and in the newsletter.

### Report Vulnerabilities

NETGEAR's Product Security Team investigates all reports of security vulnerabilities affecting NETGEAR products and services. If you are a security researcher and believe you have found a security vulnerability in a NETGEAR product or service, please click the button below for our bug bounty- cash rewards program hosted by Bugcrowd:

### NETGEAR Security Advisory Newsletter

Sign up to receive a monthly newsletter of NETGEAR security updates released for that month, addressing vulnerabilities in several products.
